## australia's engineering marvels

Author: Robert Hillman & Barrie Sheppard

Imprint: Echidna

RRP: \$29.95

*Australia's Engineering Marvels* contains the stories of the design and construction of some of Australia's major feats of engineering. Some of Australia's bridges, hydro-electric power stations, railways and communications structures were built at times when much of the technology we take for granted was not available. The books explain why and how these structures were built, what Australia was like at the time, and how the structures have survived the years. Detailed descriptions of the technology used on the projects is provided. Suitable for 10+ year olds.

## big books: where does it come from?

Author: Jane Pearson

Imprint: Echidna

RRP: \$44.00

Now available for shared reading, each title in this lively and informative series looks at an object that children are likely to encounter every day of their lives. Its journey is traced from the raw product through all the stages of production until it finally ends up in a glass, in a lunchbox or in a book! Other important aspects such as transport, storage, hygiene and packaging are explained, with full-colour photographs supporting the accessible text. Suitable for 6+ year olds.

## africa: progress & problems

Author: Various

Imprint: Mason Crest

RRP: \$44.00

Africa is a complex and diverse continent, and its more than 50 countries provide a study in contrasts: democracy and despotism, immense wealth and crushing poverty, modernism and traditionalism, peaceful communities and raging civil wars. The books in this series take a close look at many of the major issues in Africa today, such as AIDS, poverty, government corruption, ethnic and religious tension and educational opportunities. Suitable for 14+ year olds.

## atomic: non-fiction for literacy program, L3, reading age 8

Author: Various

Imprint: Raintree

RRP: \$32.95

Raintree 'Atomic' incorporates a variety of non-fiction text types to help develop key literacy skills. Each of the titles at the four levels is a different text type: discussion, information report, explanation or recount. All the books display imaginative and appealing cartoon-style artwork and inspiring photography, plus teachers' notes to support the teaching of text types. Suitable for 10+ year olds, reading age 8.

## biography from ancient civilisations

Author: Jim Whiting & Karen Bush Gibson

Imprint: Mitchell Lane

RRP: \$34.95

This series is a perfect classroom supplement for upper primary students (and beyond) who are studying ancient civilisations. Each book gives a complete overview of a famous life from history along with a snapshot of the times in which they lived. Told like a novel, each book is fast-paced and filled with fascinating information. Suitable for 11+ year olds.

## the elements in poetry

Author: Andrew Fusek Peters

Imprint: Evans

RRP: \$32.95

Shape poems, funny and thoughtful poems, traditional and new poems, each very different from the next—but all sharing an elemental link. This series brings together an exciting mix of poetical works from near and far about earth, air, fire and water, with images that leap off the page. The books are a delightful introduction to a rich variety of poetry, which cannot fail to make young readers think anew about the amazing world that we live in. Suitable for 8+ year olds.

## fast track classics \*elt edition with cd

Author: Pauline Francis

Imprint: Evans

RRP: \$16.50

A dramatically illustrated series of easy-to-read classics that are retold rather than abridged. These pacey, yet accessible texts will arouse interest in the original versions and other related stories. The accompanying CD makes these an ideal resource for English language teaching and also for students whose second language is English. Suitable for 10+ year olds.

## remains to be seen \*pb

Author: John Malam

Imprint: Evans

RRP: \$19.95

This fascinating series looks at the past through the archeological evidence that remains with us today. The titles examine the way people lived in ancient societies, their achievements, religious beliefs and festivals, and how and why the civilisations rose and fell when they did. There are fact boxes and a timeline in each book, and the text is supported by a wonderful array of photos and maps. Suitable for 12+ year olds.

## a weird history of science

Author: John Townsend  
Imprint: Raintree  
RRP: \$39.95

With strong links to scientific enquiry, this series covers many stories of crazy experiments from down the ages that went horribly wrong—as well as some wild ideas that turned out to be absolutely correct. Packed with fun facts and figures that link to the science curriculum, each title includes search tips, a 'find out more' section to encourage students to develop understanding, and a timeline to help put developments in science into context. Suitable for 12+ year olds.
